

Recording children's progress and planning.

At Little Oaks we recognise that every child is unique and that observing and recording a child's developmental achievements is essential if we are to help a child reach their full potential.

We also recognise that it is important that such records are shared with a child's parents or carers and that they are able to contribute to these records.

By keeping such records, a child's key person will build an accurate and detailed picture of not just what a child is learning but also how a child is learning. This will enable the key person to compile individual learning plans for each child, thus ensuring that their individual needs can be met via the planning process and that every child has every opportunity to have a happy and successful time at Little Oaks.

In order to do this, we will keep:

Developmental Records:

- A developmental record will be started with each child when they join Little Oaks, via the on-line journal system, Tapestry.
- The individual journals can be accessed by parents and carers via a password chosen by themselves. They, and staff have access to this at all times.
- In the journal will be spontaneous observations, detailed observations, reflections, photographic evidence of children's achievements and, where applicable, examples of their creative achievements and mark makings.
- This information will be organised under the 7 areas of learning or under "characteristics of effective learning".
- As children do not learn in a compartmentalised fashion, staff will organise the observations using a "best fit" and will be mindful that there will be useful evidence for all areas of learning under all headings.
- All staff will carry out spontaneous observations on all children and the key person will be responsible for recording these in the journal.
- All children and parents/carers will be encouraged to contribute to the journal and the rationale and importance of this will be explained at the child's pre-start home visit.

Spontaneous Observations:

- All staff will carry these out on all children as children do not stop learning and exploring just because their key person is out of sight.
- Spontaneous observations will be seen as an essential tool in understanding what and how a child is learning and developing.
- The child's wellbeing and involvement will be recorded along with the spontaneous observations.

Detailed Observations:

- These will be carried out by a child's key person to the schedule set out below.
- The child's key person is responsible for recording these and analysing and recording what each observation tells us about a child's capabilities.

- Detailed observations will be shared with a child's parent or carer as set out below.
- The parent or carer will be asked to analyse the observation...is it typical of how the child is at home? Does it sound like "their child"?
- The parent/carer's comments and input will be recorded on the observation by either the parent/carer or the key person and together the parent/carer and the key person will agree the child's "next steps".

Two-year Old Progress Check

- This will be carried out on all children who join Little Oaks before their 3rd birthday. If a child attends another OFSTED registered setting where they spend more hours per week than at Little Oaks, the progress check would usually be completed by the other setting.
- Where a child does attend another setting Little Oaks will seek to obtain permission from the parent/carer to share the findings of the check with the other setting. This would benefit the child and ensure all are working together to support the child's learning and development.
- Where Little Oaks do complete the check it will be carried out by the child's key person usually between 6-8 weeks after they start attending Little Oaks.
- The progress check will fulfil all statutory requirements, and will focus on the child's development in the 3 prime areas.
- The findings of the check will be shared with the child's parent or carer via Tapestry and the next steps agreed.
- It is the responsibility of the child's key person to compile the check. However other members of staff may have useful and relevant information to add.
- The purpose and rationale for this progress check will be shared with parents/carers at their pre start home visit.

Transition document:

- This will be completed for all children who leave Little Oaks for another setting or school after their 3rd birthday.
- The document will be completed as per Northamptonshire County Council guidelines.
- The findings will be shared with the child's parent or carer.
- It is the responsibility of the child's key person to complete this document.

Baseline Assessments:

- This will be carried out on all children 6-8 weeks after joining Little Oaks (or before if applicable)
- For children joining us aged before 3 years of age, it will usually be carried out in conjunction with their 2-year progress check and will cover the 3 prime areas.
- For children joining aged 3 years and older who have not attended a previous setting then it will cover all 7 areas where staff judge that they know the child well enough to make a useful and accurate judgement.
- Where a child transfers to Little Oaks from another setting then we would expect progress information to come with the child from that setting and therefore a new baseline assessment may not be necessary.

Progress Summary and Tracking Documents:

- This will be completed 3 times a year on all children.
- It will provide a clear, concise report on a child's development.
- For children aged 3 years and over the progress summary will provide information on all 7 areas of learning and a "best fit" judgement will be made about the child's age and stage of development.
- For children aged 2 years it will primarily focus on the 3 prime areas of learning and will in addition provide information on the links to the 4 specific areas too.
- The progress tracking will provide information on all 7 areas of learning when the keyperson feels able to make a judgement on all areas. The expectation will be that in most cases this will be possible.
- These will be completed by each child's key person.
- Evidence of a child's abilities and achievements will primarily come from the child's learning journey. HOWEVER, staff will be expected to apply their professional judgement and if they are confident about a child's abilities they may still record these even if they do not have any hard copy evidence.

Cohort Progress Tracking:

- The above information will be used to record and monitor cohort progress.
- This is the responsibility of the setting manager.

Monitoring Well being and involvement Levels:

- All children's levels of involvement and well-being will be monitored and recorded.
- We understand that all staff involved in the care of each child has a part to play in this so we will therefore meet as a group to decide upon a child's level. All staff involved in the care of the child will have an equal voice.
- Levels will be recorded 3 times a year.
- Where applicable a level will be recorded for spontaneous and detailed observations to allow a complete picture to be built.
- All staff will work to the attached level when assessing children's levels of well-being and involvement.
- Whilst appreciating that children's levels can and will fluctuate if they are assessed to be of concern the child's key person will arrange a meeting with the parents or carers and a plan will be agreed to help the child. Where applicable these needs will form part of the planning process.
- A review date will be agreed between the key person and the parent/carer.

Planning for the Individual Child:

- All the above will form invaluable information on a child's abilities, skills, interests and traits.
- All of these can be used to form a clear, professional and individual development plan for each child.

- The plan should take account of developmental needs, well being and involvement levels, schemas, children's interests, characteristics of effective learning and any additional needs.
- For the under 3's the development plan will focus on the 3 prime areas of learning with links to the specific areas as applicable... For the older 3's the plan will focus on the 3 prime areas until a time when the child is secure and achieving well within these. At this stage it would be appropriate to also plan for the 4 specific areas of learning. The expectation will be that most 3 year olds will be making good progress in all 7 areas of learning.
- It is the responsibility of each key person to compile a written plan for each child and these need to be monitored, reviewed and updated at least 3 times a year.
- The information from this will then inform the planning process.
- It is the responsibility of each key person to ensure that each individual child's individual needs are being met through the planning process.

Family Observations:

- During a child's academic year, a 'Reflection' document will be completed on them. A photograph will be taken that depicts what they have been interested in for that half term and a write up attached with it. Parents/carers will be given the opportunity to do one of their own at home.
- These will form a valuable part of the "whole picture" of the individual child.

Observing, tracking and sharing schedule:

Conducted over 6 periods per year

Playgroup:

Term 1:

- 2-year progress check with baseline assessment or detailed summative for September starters, shared with parents/carers.
- Individual Development plan.
- Well-being and involvement levels monitored.

After $\frac{1}{2}$ term

- 2-year progress checks with baseline assessment or detailed summative for October starters, to be shared with parent/carers.
- Dots of progress along with highlighting of development.
- Individual Development plan.

Term 2:

- 2-year progress check with baseline assessment or detailed summative document for January starters, shared with parents/carers.
- Detailed observation for Sept/Oct starters, next steps discussed with parents/carers.
- Individual Development plan.
- Well-being and involvement levels monitored.

After $\frac{1}{2}$ term

- 2-year progress check with baseline assessment or detailed summative document for February starters, shared with parents/carers.
- Detailed observation for January starters, next steps discussed with parents/carers.
- Dots of progress along with highlighting of development.
- Individual Development Plan.

Term 3:

- 2-year progress checks for January starters
- Baseline Assessment for January starters.
- Individual Development plan.
- Detailed observation for September starters.
- Completed 2-year progress check to be shared with parent/carers.
- Detailed observations to be shared with parents/carers.

Term 4:

- 2-year progress checks for February starters.
- Baseline Assessment for February starters.
- Individual Development plan.
- Detailed observation for October/November starters.
- Completed 2-year progress check to be shared with parent/carers.
- Detailed observations to be shared with parents/carers.
- Progress Tracking and Progress Summary for Sept, October/November starters and progress tracking for January starters.

Term 5:

- 2-year progress check for April starters.
- Baseline Assessment for April starters.
- Individual Development plan.
- Detailed observation for September and January starters.
- Detailed observations to be shared with parents/carers.

Term 6:

- Individual Development plan.
- Detailed observation for October/November and February starters.
- Detailed observations or progress summary as applicable to be shared with parents/carers.
- Progress Tracking and Progress Summary for all children.

Pre School

Term 1:

- Detailed observation or baseline assessment if applicable.
- Individual development plan
- Detailed observation to be shared with parent/carer.

Term 2:

- Progress Tracking and progress summary document.
- Individual development plan updated
- Progress Summary document to be shared with parent/carer.

Term 3:

- Detailed observation.
- Individual development plan updated
- Detailed observation to be shared with parent/carer.

Term 4:

- Progress Tracking and progress summary document.
- Individual development plan updated.
- Progress summary document to be shared with parent/carer.

Term 5:

- Detailed observation.
- Individual development plan updated
- Detailed observation to be shared with parent/carer.

Term 6:

- Progress Tracking and progress summary documents.
- Progress Summary document to be shared with parent/carer.
- Well being and Involvement levels will be monitored across all children 3 times a year and support plans put in place, shared with parent/carers and reviewed as applicable.

This policy was adopted at a committee meeting held on

Signed on behalf of the committee.....

Role of Signatory.....

Policy updated Nov 2012, Reviewed Mar 15, April 2018.
